1. A radar station is located south of Hostoun (N51/P61). The station is built underground. The mast is of steel and is five centimeters in diameter. The radar antenna is dish-shaped, 140 cm in diameter and can be rotated. The station is connected by radio and telephone with Pilsen. On 1 February 1951 the radar team, composed of soldiers of the Czech Air Force, was replaced and was sent to Pobezovice.
2. There is a similar radar installation located in Tematin castle near Piestany (P49/T44). It is also manned by Air Force men. A radar station is also located in a building in a field about 500 m north of Bojna (P49/T54). The installation is similar to those mentioned above. The station is connected by telephone with Piestany.

Attachment: Sketch of radar installations at Hostoun and Bojna.
